Here on easygta5.com, we've been looking for the best video games of all time, but after a while we started to question whether or not there were any good new games on the market at all. That was until one of our editors found GTA Namaste America online and instantly downloaded it to play. It turns out that this is a HUGE open world game with over 300 square miles of terrain, from cold barren deserts to lush green forests and everything in between. You can play as a criminal or as an undercover cop and either way it's a blast. Oh, and the graphics are amazing for this time frame. Don't miss out on this one!
